

Fishing magnet MI

The Fishing Magnet is designed to remove small objects having ferromagnetic attraction from oil, gas and exploratory well bores. The Fishing Magnet consists of a body, sub, magnet element and guide. Sub has a tool-joint thread at the end. Removable guide can be designed in three different types: mill guide, lipped guide and flush guide.

Code	Guide ID, in	Load capacity, lbf	Total length (without guide), ft	Outside diameter (without guide), in	Connection, API
